(5) additional explanation of other management costs

Other management costs are calculated as at 30 June each year (or the date you cease membership) which depend on a number of factors:

- the costs applicable to your member investment choice(s)
- the amount invested in these options
- the duration of the investment
- the timing of contributions, rollovers, withdrawals, and other factors affecting your account balance.

Other management costs do not include operational and transactional costs associated with the buying and selling of underlying investments (for example, brokerage). These costs are deducted from the assets of the Health Super Fund prior to the calculation of returns. Other management costs are costs associated with the administration and investment of your account and are deducted from the Health Super Fund before the calculation of investment returns allocated to member accounts. For the 2006/2007 year an Asset Fee of 0.10% was deducted. In future years the Asset Fee of up to 0.10% p.a. may be charged. For more information about "other management costs" see the Product Disclosure Statement for Accumulation accounts.

(6) additional explanation of total fees you paid

The total fees you paid includes fees deducted directly from your account (see transaction listing above), excluding any relevant insurance premiums, and approximately \$ 120.15 of "other management costs" that have been deducted from investment earnings before they were applied to your account. Where any indirect management costs or expenses are tax deductible the benefit of any deduction is passed onto members through the declared investment returns for each option. A Contributions Tax Adjustment is made for any deduction for account keeping fees and insurance premiums deducted from your account.
