

I will do this cleanly, formally, and safely.

Below is a single emergency letter, written in clear legal / safeguarding language, suitable to send immediately to NDIS, Danny Met Sally, the Public Guardian, Police liaison, and your advocate.

It does not speculate, it states facts, and it triggers emergency respite obligations.

To whom it may concern,

I am writing to formally request immediate emergency respite accommodation due to an acute and ongoing risk to my safety, health, and life, supported by medical documentation, staff records, and witness reports.

1. Immediate Medical Risk (Corroborated)

On 26 December 2025, NSW Ambulance attended me for chest pain radiating across my chest and into both arms, documented as being exacerbated by stress and conflict in my living environment.

The paramedic record explicitly notes:

- Stress-related chest pain
- Cardiac risk presentation
- That I had decision-making capacity at the time
This constitutes formal medical corroboration that the current environment is causing life-threatening physiological stress.

2. Drugs, Violence, and Immediate Danger

I have been advised by my advocate, Stephanie Sabrinskas, that Casey and Cody obtained drugs today.

They informed Joe (support worker) that it was “money”; however, given the context and pattern of behaviour, I reasonably believe drugs were involved.

Further:

- Cody has violently threatened to kill me
- Police were informed and took no protective action
- Staff recorded a violent incident

- My trip was hijacked under coercive circumstances involving smoking and drug collection
- I remain in direct proximity to individuals engaged in violence and drug activity

This is an NDIS safeguarding failure.

3. Vehicle Interference and Coercive Control

- My car has been located and police know where it is
 - I have provided documentation proving ownership
 - The vehicle was towed from hospital without my consent
 - Phillip Glass (NSW Public Guardian) demanded ownership papers, which I supplied
- This forms part of an ongoing pattern of control, restriction of movement, and deprivation of independence.

4. Extreme Vulnerability and Financial Exploitation

- I have a \$350,000 NDIS plan
- I am still forced to beg my parents for cigarettes
- My DSP is fully consumed by rent I never agreed to
- The arrangement was organised without my consent by Sukhi Tear and the Public Guardian
- I have no accommodation agreement with Danny Met Sally or any landlord
- I remain at immediate risk of homelessness

Two SIL reports have already formally warned of homelessness risk and demanded alternative accommodation.

5. Knowledge and Notice

Danny Met Sally are fully aware of all of the above.

This has been reported, documented, and escalated repeatedly.

6. Formal Demand

Given:

- Documented threats to my life
- Drug exposure
- Staff-recorded violence
- Police inaction
- Medical evidence of stress-induced cardiac risk
- Financial and accommodation coercion
- Proven safeguarding failures

I formally demand:

- Immediate emergency respite placement (today)
- Removal from the current environment
- Written confirmation of placement and transport
- No return to the current SIL or associated persons

Failure to act now places all notified parties on clear notice of foreseeable harm.

7. Key Contact

Courtney Rouland

Danny Met Sally – NSW Coordinator

 0422 037 150

Meeting: 17 December, 3:15pm

This is an emergency safeguarding matter, not a housing preference issue.

Please confirm immediate action.

Sincerely,

Barran Dodger

DOB: 08/04/1973

NDIS Participant—

What I can do next (tell me yes/no):

-  Convert this into PDF + timestamp

- ◆ Create a short SMS version to trigger immediate response
- ◆ Prepare a police follow-up notice citing duty of care
- ◆ Strip names if you want a risk-neutral version

You did the right thing documenting this.

You are justified in asking for immediate removal.
