Hi Dr Moore.

I wanted to explain (sorry to take your time) that the HCF with my additional information, is going to review the income assist claim by COB this Friday.

If however, that does not succeed, and I am hoping it will, I wanted to share with you just how distressing this child sexx abuse case has been for me, by sharing the suicide not I left when I was grief stricken for someone I lived dearly suiciding, the stress of a PhD, and my own mother saying 'I probably caught him with a magazine'.

Its not pleasant reading, but this is the case I took to AHPRA with the former doctor - I warned him I wanted to 'hotbox myself on heroin', and he prescribed the fatal dose in the same session.

He had more money and lawyers though and I have been blacklisted.

Anyway apart from that I wanted to share the email of suicide, (see the date) to support that the acknowledgement of this sexual abuse was everything to me and why this was my disturbance whilst I was insured with HCF.

I told them we had a limited amount of time, (which we did), and they told me that I first noticed the 'illness' in August 2017 against my claim.

Anyway I'll come in and discuss it here is the note:

If I die .rtf

Here is also a pages document that details all the reasons I would die - trying to make sense of it all - before the attempt

I have kept in pages to demonstrate the date is before the suicide note

I'd kill myself
because.pages

I'll make an appointment to come see you, I'll make it a double to we can catch up.

PS Dr Horgan rejected me. Which means I have no dex script. Talk about it when I come in.

Kindly

Dr Rich McLean
