Why's he all right, then? Blustered Uncle Vernon. Why isn't he all empty, then? Because I used the Patronus - WHOOOSH. With a clattering, a whirring of wings, and a soft fall of dust, a fourth owl came shooting out of the kitchen fireplace.

Your scar hurt? Harry, that's really serious....
Write to Professor Dumbledore! And I'll go and
check Common Magical Ailments and
Afflictions.... Maybe there's something in there
about curses. ~~And then came a new sound—~~ 'd be Hermione's
advice: Go straight to the headmaster of
Hogwarts, and in the meantime, consult a book.
Harry stared out of the window at the inky blue-
black sky. He doubted very much whether a book
could help him now. As far as he knew, he was
the only living person to have survived a curse
like Voldemort's; it was highly unlikely, therefore,
that he would find his symptoms listed in
Common Magical Ailments and Afflictions. As for
informing the headmaster, Harry had no idea
where Dumbledore went during the summer
holidays. He amused himself for a moment,
picturing Dumbledore, with his long silver beard,
full-length wizard's robes, and pointed hat,
stretched out on a beach somewhere, rubbing
suntan lotion onto his long crooked nose.
Wherever Dumbledore was, though, Harry was
sure that Hedwig would be able to find him;
Harry's owl had never yet failed to deliver a letter
to anyone, even without an address. But what
would he write?

- and reading between the lines of that Skeeter woman's article last month, Moody was attacked the night before he started at Hogwarts. Yes, I know she says it was another false alarm, Sirius said hastily, seeing Harry about to speak, but I don't think so, somehow. I think someone tried to stop him from getting to Hogwarts. I think someone knew their job would be a lot more difficult with him around. And no one's going to look into it too closely; Mad-Eye's heard intruders a bit too often. But that doesn't mean he can't still spot the real thing. Moody was the best Auror the Ministry ever had. So... what are you saying? said Harry slowly. Karkaroff's trying to kill me? But - why? Sirius hesitated.
