

Transformational Change – Loyal Solider

This structural constellation provides a process for bringing awareness to unconscious survival strategies/patterns. Soldiers who had been discovered forgotten on islands long after the end of the war remained stuck in “survival mode”, the challenge was how to support their integration back into society when “survival mode” was no longer a necessity. The loyal solider structural constellation allows you to welcome home the “loyal solider” and come out of survival mode. The loyal solider represents that part of you that allowed you to survive, just like the Japanese soldiers after the war, but no longer serves a purpose in your life today.

The Transformative Therapies Foundation is proud to offer this half day workshop presented by renowned Systemic Therapist, Matt Dilges with over 27 years’ experience and qualifications in Mental Health Nursing, Psychology, Family Therapy, Human Services Management and Sensorimotor Art Psychotherapy.
