

14/12/2023

Dear Richard

Thank you for allowing us to continue to work with you for your NDIS support coordination service. I am writing to you to provide you with some information as to how we will be able to provide support coordination services to you and work alongside you.

This letter includes information and about how we will communicate, and our process to develop a comprehensive support plan.

To do this well we need your assistance with the following:

Communication and engagement

Telephone and Email Etiquette agreement

We want to work together in a respectful and professional way and will not tolerate threats or abuse of staff. We do not give consent for any of our interactions to be made public. We will not respond to correspondence that includes threats to our staff or other providers.

All direct communication will be via scheduled appointments at reasonable intervals in line with the available funding in you NDIS budget.

Support planning

We will collate information from you about your goals and what matters to you, This goes to the heart of a support plan.

The support plan will include action plan and accountabilities and will be reviewed with you at regular intervals.

We will work with you and your professional support team to negotiate appropriate solutions.

Claiming

We claim for all activities in line with the NDIS Practice Standards. This is claimed in 15minute increments. Please be aware that you have a limited number of hours for level 2 and 3 support coordination, and we want to make the best use of the time we have. I recommend limiting volume of correspondence as reading emails is a claimable activity.

Safety Planning

Your wellbeing is a priority, but this is a shared responsibility and encourage engagement with NDIS funded and non-NDIS funded supports. As you have experienced hospital admissions, I recommend you consider developing an Advance Care Directive about communicating your preferences for future health care. We will complete a risk assessment with you to ensure your dignity of risk is identified.

Yours Sincerely

Vanessa Ede-Scott

Operations Manager Support Coordination
