

Summary of the PhD Thesis

Title: "A Journey of Young Lives, Conversations and Self-Reflexive Creativity Encompassing AI, Superintelligence and the Future World(s) of Posthumanism Framed by the Anthropocene."

Abstract

This arts-based, practice-led, qualitative theoretical work explores young people's ethical opinions about what it means to be human now and in the future through three cumulative technological lenses: artificial intelligence (AI), anticipated superintelligence, and the broader context of the Anthropocene.

Main Points and Themes

1. Technological Impact on Humanity:

- Examination of how AI and superintelligence will reshape human identity and ethics.
- Discussions on posthumanism and the integration of technology in daily life.

2. Ethical and Moral Perspectives:

- Collection and analysis of young people's opinions on the ethical implications of AI and superintelligence.
- Themes of equality, moral status, and societal impact of technological advancements.

3. Methodology:

- Utilization of a/r/tography (arts-based research methodology) to engage with young participants.
- Creation of a six-part curriculum to guide discussions and gather data.

4. Personal Narratives and Reflexivity:

- Inclusion of the author's personal experiences and reflections throughout the research process.

- Emphasis on self-reflexive creativity and autobiographical elements.

5. Educational Engagement:

- Interaction with local students to foster open-minded discussions about the future of technology and ethics.
- Encouragement of creative and critical thinking through structured interviews and discussions.

6. Influence of Ancestors and Spiritual Guidance:

- Recognition of ancestral spirits and their impact on the author's life and work.
- Spiritual and holistic healing practices mentioned as part of the personal narrative.

7. Artistic Contributions:

- Integration of artistic works and creative expressions to illustrate research findings.
- Use of multimedia elements such as films and digital art to complement the theoretical framework.
