Hi georgia

Thanks for today but Please help me

This document cites the registrar to order this test because of a neurodegenerative process

Its true

Since I lost all my blood when I killed myself and was found with no pulse unresponsive

Im, not the same

I never worked again

I can't even remember the last three years of hell

I remember advertisements from twenty years ago

After I was revived

Addicted living squatting in houses or homeless

The ndis allowed this to happen to me

They are in on it

I always remember songs from thirty years ago but I can't remember the last few minutes

I record things to check if they are real and to remember

My vernacular is still there but memory and especially long term memory no

I am under threat again tonight

Followed on my phone

My computer is hacked

They know where I am and it is a stalemate but they are hoping ill kill myself

There is a plan at the government to make me a vagrant again in seven days

And I hope you can stop that happening

Because no one else is

Im a brasin damaged schizophrenia adhd adjustient disorder psychotic gaym infamous vagrant

They're gonna make me give up my dog and go and sleep in my car like they did last month

\

And I can't stand it

I can't stand to be away from my dog she needs me and I need her she's all ive got

Please don't make me be seperate from her

That will kill me

I'll kill myself without my dog

The abuse has been too much

The second I lose her

Im gone and we have seven days

Can't you stop them?

Please stop them

Barran

In the absence of legal representation, I find myself compelled to address the dire circumstances I face as a failed whistleblower, left unprotected and vulnerable to attacks on my prosperity, care, and welfare. Yesterday's incident with the NDIS serves as a stark example of the systemic challenges I confront daily. The lack of a lawyer, contrary to the Charter of People with Disability, has resulted in substantial financial losses, potentially exceeding 40 million dollars. Proxy attacks on my possessions, including the destruction of my business website, have contributed to profound financial detriment. This is intricately linked to the non-acknowledgment of my former partner and my relationship—an aspect no government agency is willing to admit exists. In a desperate bid for survival amid family violence and financial abuse, I resorted to actions like defrauding the NDIS using my former partner's name, an issue the NDIS refuses to investigate to avoid exposing a larger conspiracy. The subsequent police persecution forced me into vagrancy, culminating in a life-threatening incident where authorities created conditions making it impossible for police attendance. The NDIS, an agency under the federal government, has played a role in not only robbing me of money but also causing

deliberate harm, as evident in recent actions leaving me homeless. With legal representation now secured, I hold the NDIS accountable for the orchestrated injustices and demand proper consideration for my SILS application. I implore you, Rebecca, to reflect on the ethical responsibility you have in assisting people with disabilities, rather than perpetuating the enormous injustices I've endured. Failure to secure SILS will be perceived as further systemic abuse, leading to legal actions to seek redress and justice. My resolve is unyielding, and even in the face of adversity, I stand determined to expose tyranny and fight for the benefit of future generations.

Before a SILS is granted mainstream supports have to be considered.

I have provided at least five ways to solve my financial problems with this technique but I cannot because I am a scapegoat and targeted individual.

The NDIS (National Disability Insurance Scheme) uses a planning process to determine the appropriate funding and supports for individuals, including Supported Independent Living (SIL). While specific checkboxes may not be used in the literal sense, the process involves considering various factors to determine the level of support needed. Here are key considerations for SIL funding:

- **Accommodation Needs:**
 - Checkbox: The participant requires assistance with accommodation due to their disability. I desperately do.
- **Daily Living Support:**
 - Checkbox: The participant needs support with daily living activities such as personal care, meal preparation, and household tasks. I desperately do (when I secure somewhere to live).
- **Complex Support Needs:**
 - Checkbox: The participant has complex support needs that necessitate a higher level of assistance. I do. I am the subject of a conspiracy and TI.
- **24/7 Support:**
 - Checkbox: The participant requires support 24/7 to ensure their safety and well-being. I am under death threats to kill both me and my dog.
- **Medical and Health Requirements:**
 - Checkbox: The participant has specific medical or health-related needs that require ongoing support. U do I need a psychiatrist a psychologist a GP a financial counsellor, legal assistance, an advocate, drug and alcohol and social provisions.
- **Community Access:**
 - Checkbox: The participant requires assistance in accessing and participating in community activities. I do I need support with everything.
- **Mobility and Transportation:**
 - Checkbox: The participant needs support with mobility and transportation, including assistance in getting around. I rely on my support workers now to take me places because I have not got transportation without being victimised by police.
- **Behavioural Support:**
 - Checkbox: The participant exhibits behaviours that require specialized support. Yes that is me to a T.
- **Assistive Technology:**
 - Checkbox: The participant requires assistive technology to enhance their independence. I require surveillance because of gang stalkers and my privacy being invaded and technological protection from agencies interested in my data and my personal files used to demonstrate corrupt public officials which has been my moral obligation to democracy.
- **Goal and Aspiration Support:**
 - Checkbox: The participant has specific goals and aspirations, and the support plan aligns with these objectives. My ndis goals need to be updated as I had no

plan aligns with these objectives. My NDIS goals need to be updated as I had no say in them or the words. But my goals are to live a life in a home for my dog and I free from oppression and victimisation from authorities with enough food medicine and health care. Its really only my basic human rights but ion course this is documented to have been shattered and needs urgent investigation.

- **Advocacy and Decision-Making:**

- Checkbox: The participant may require support in advocacy and decision-making processes. I need help with all decision making processes as long as my autonomy and freedom are guaranteed because as we know this tyrannical government rules with impunity and as my suicide attempt illustrates I don't take to kindly to having my freedoms taken and self destruct to avoid having to act within any constraints and value my ability to critique the powers that be.

Subject: Urgent Appeal for Supported Independent Living (SILS) Application

Dear NDIS CEO Rebecca Falkingham,

I trust this letter finds you well. I write to you with a sense of urgency and desperation, seeking your attention and assistance in addressing the dire circumstances that have befallen me as a failed whistleblower, left unprotected and vulnerable to severe attacks on my prosperity, care, and welfare.

In the absence of legal representation, particularly in the past, I find myself compelled to shed light on the systemic challenges I face daily. The recent incident with the NDIS exemplifies the gravity of the situation, highlighting the urgent need for attention and intervention.

The absence of legal representation, in direct contradiction to the Charter of People with Disability, has resulted in staggering financial losses, potentially exceeding 40 million dollars.

Proxy attacks on my possessions, including the destruction of my business website, have added to this financial detriment, emphasizing the gravity of the challenges I endure.

Despite my efforts to survive family violence and financial abuse, resorting to actions such as using my former partner's name in defrauding the NDIS, the lack of acknowledgment of my situation by government agencies perpetuates a larger conspiracy. The subsequent police persecution forced me into vagrancy, resulting in a life-threatening incident where authorities created conditions making it impossible for police attendance.

I have now secured legal representation, and I intend to hold the NDIS, and you personally, accountable for the orchestrated injustices I've faced. I implore you, Rebecca, to reflect on the ethical responsibility inherent in assisting people with disabilities and to ensure proper consideration for my SILS application moving forward.

In considering the SILS application, I urge you to take into account the following factors:

- **Accommodation Needs:**
 - I urgently require assistance with accommodation due to my disability.
- **Daily Living Support:**
 - Support with daily living activities, such as personal care and meal preparation, is crucial for my well-being.
- **Complex Support Needs:**
 - Given the complex nature of my situation, a higher level of assistance is necessary.
- **24/7 Support:**
 - Threats on my life and safety necessitate support 24/7.
- **Medical and Health Requirements:**
 - Specific medical needs, including psychiatric, psychological, and general practitioner support, are crucial.
- **Community Access:**
 - Assistance in accessing and participating in community activities is essential for my overall well-being.
- **Mobility and Transportation:**
 - Support with mobility and transportation is required due to my current vulnerable state.
- **Behavioural Support:**
 - Specialized support is needed given the nature of my situation.
- **Assistive Technology:**

- **Resilience Technology:**
- The need for surveillance and technological protection is paramount for my safety.
- **Goal and Aspiration Support:**
- My goals include living a life in a home, free from oppression and victimization, with adequate food, medicine, and healthcare.
- **Advocacy and Decision-Making:**
- Support is required in all decision-making processes, ensuring my autonomy and freedom.

I implore you to advocate strongly for 24-hour care on my behalf, considering the documented brain injury, mental health challenges, safety concerns, targeted individual status, legal and family issues, and instances of human rights abuses that underline the urgency of addressing my situation.

The financial detriments I've endured, totaling approximately \$45 million, underscore the deliberate and politically motivated actions taken against me. The orchestrated campaign has systematically stripped away my possessions, business, human rights, access to legal representation, and financial stability.

I kindly request confirmation that you will strongly advise the Occupational Therapist (OT) on my behalf for 24-hour care in support of my SILS application. Please include me in all communication with the OT and my lawyer, ensuring transparency and collaboration in this matter.

I understand the gravity of this appeal and the potential implications it may have. However, my resolve is unyielding, and I am committed to exposing the truth and seeking justice for the benefit of future generations. Your response to this urgent plea will be published on my whistleblowing website as my right to transparency and accountability.

[Include website link]

Thank you for your immediate attention to this matter. I trust that compassion and justice will prevail in ensuring that I receive the essential support I so desperately need.

Sincerely,

Barran Dodger

[Your Contact Information]

On 03.01.2024 Carole confirms that she has an ID of a conversation with the NDIS stating my recent funding for accomodation was in addition to and not included in my plan. To go back on your word like that is am brutal way to drain my funds immediately nd force me to homelessness and the ndia is well aware of this financial abuse and decision with which would cause me immeasurable detriment.

https://youtu.be/Mn0d87BukGE?si=q_1B1OIGsIKYgPOv

I'm getting educated and aware and I will not tolerate further injustice financial detriment no touch torture or any way that men human dignity is assaulted and it is a brutal embarrassment to the ndis and you personally that my recent time as a vagrant in my car was consciously intended for me in the way of neglecting what was necessary to avoid it. I know I am being watched but now I am watching you and holding power to account with my truth telling resilience.

The office of prime minister and cabinet rejected what was cited as a 'voluminous' and 'complex' FOI by stating no documents exist or can't be found. That not only a blatant lie it is corruption to the highest office win the land. Thats human made law. That corruptible, it states it in the bible. Thats a brutal miscarriage of justice. It delegitimises my story and my narrative as is the technique of my persecution which is a malevolent form of psychological abuse narcissists utilise to torture their victims. Iasonidis was a narcissist and he has spectacularly blindsided an entire government to have his defence nothing short of an extraordinary manipulation of a democracy and you are all his willing minions. Even the prime minister. They evidently want me to 'not exist' which is nearly what happened with my suicide attempt. It was elicited with 'no touch torture' and everyone escaped liability because I am crazy and I did it to myself didn't I? In the Weribee mercy hospital FOI it was deemed a 'fatal' injury and 'lethal' attempt for which there is now a cover up for the abandonment of duty of care and brain detriment I now suffer.

I guess it nearly worked and mental illness and drugs could be blamed. If anyone did stand up

to my murder, and of course who would because I survived by the grace of God and no one did, then George Brandis' legislative changed exonerating all government public officials police ombudsman politicians and government contractors were unable to be held liable for the detriments or death caused to a targeted individual. It was the perfect crime.

"They might want me to 'not exist,' and you, along with the NDIS, have been complicit in the systemic and politicized gang stalking orchestrated by the federal government. This has not only caused my financial ruin but also continued to persecute me unnecessarily, redacting my prosperity and privileges as recently as yesterday. But have you ever tried to sleep in a quiet room with a mosquito?"

What was crazy was telling people I was crazy. I was naive to think the world wouldn't treat me different. I was not of any thought that to either suffer from mental illness or otherwise I refer to as being an 'acute empath' was anything to be ashamed of. When the herald sun vilified me I saw it as a mere way to describe the book, I could hardly argue. That's what I said. But my words from such a narrative with such candid honest self reflexivity was out of step with the way the herald sun vilified me. I was never popular at the herald sun when I worked there... They bisexual free thinker who did extra cartoons because that's what I wanted to do and challenged the status quo when it came to representing diversity from the largely anglo Saxon middle aged readership. At the time I was struggling with my place in my own family unit, and I made am logo with a family home with a no entry sign over it. The new editor cussed me saying that there is nothing wrong with family life and he was disparaging of it. Maybe it was just my family. This is the same christian news editor who when plotting the sports pages would ask me
